Online learning – Yr 7/8 Specialist Centre

Students are familiar with accessing the website. 80% is target score for activities. Samlearning works by repetition, so activities can be repeated on numerous occasions over a period of time to ensure progression and retention of information. Students have previous activities set which they can review and try again to recap previous learning along with looking at our current topics.

BBC Bitesize to be used as a reference for information to support samlearning tasks. Students to access KS3 content.

www.bbc.co.uk/bitesize

Student have also started used a maths site; please encourage them to access it if possible:

https://hegartymaths.com/login/learner

Numeracy Ninja's – I have included a booklet and powerpoint in the shared zone for students to do 3x/week. They are used to doing this at the start of their maths lessons and the powerpoint will guide them through it. Time allowance is doubled so the countdown slide just needs to be repeated ☺
