

Monophonic

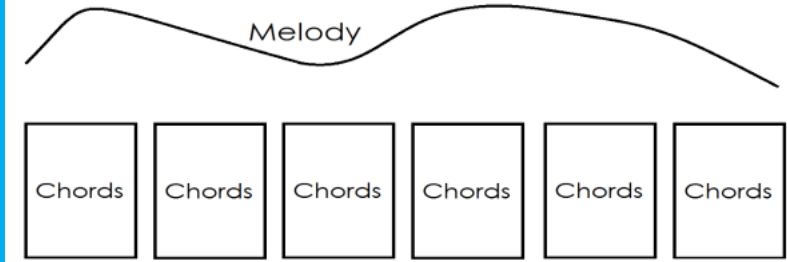

- One Melody played on its own
- One Sound

Texture describes how layers of sound interact with each other in a piece of music.

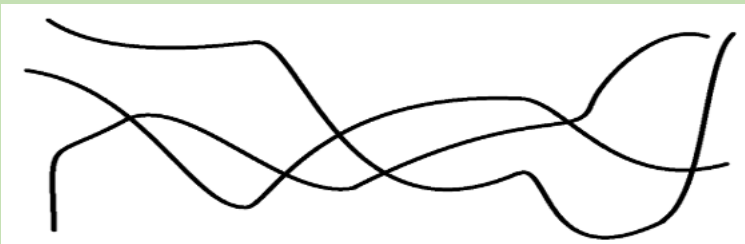

- Thick = Lots of layers of sound
- Thin = A Few layers of sound

Homophonic

- Melody and Chords
- Played at the same time

Polyphonic

- More than one melody played at the same time.
- Very complex and busy

Texture

"Onions have Layers"

Unison

- Same melody and same notes.
- Played by multiple instruments and voices
